ROE to reach new peak in 2026F on strong disbursements

- We raise our target price (TP) by 17% and upgrade our rating from OUTPERFORM to BUY, as the positive impact from rolling forward our valuation horizon to mid-2027F and lifting our aggregate 2026–2030F earnings forecast by 18% outweigh our more conservative multiples.
- **We expect F88 to sustain an attractive 29–39% ROE over 2026–2030F,** supported by strong growth headroom in Vietnam's underserved borrower segment and structural advantages in branch scale, funding access, fee-income diversification, and technology adoption.
- **Undemanding valuation:** Based on our forecasts, F88 is trading at a 2026F P/E of 14.9x and P/B of ~4.9x, despite an expected 39% ROE and 62% revenue growth in 2026F.
- Assuming a 10% stake public offering at VND71,000/share to happen in Q3 2026, our implied TP would be VND93,000/share. We believe this offering price indicates an attractive discounted entry point ahead of F88's planned UPCoM-to-HOSE transfer (also planned in 2026).
- **Downside risks:** Credit cycle risks; regulatory and policy risk; funding and refinancing risk.

We raise our 2026F earnings forecast by 18%, projecting a historically high ROE of 39.1%. The company outperformed our expectations Q1 2026, the seasonally softest quarter, with NPAT-MI reaching a record VND241bn (+131% YoY), driven by robust disbursement growth, resilient lending yields, and a rapidly expanding insurance fee pool. More importantly, the result indicates to us that scale is increasingly translating into earnings efficiency, supported by improving branch productivity, a higher repeat-customer contribution, and stronger operating leverage. While elevated rates remain a headwind, we believe improving funding costs, capital efficiency, and strong growth momentum should outweigh near-term asset-quality pressure.

Regulatory overhang remains a key concern for F88, but we view near-term disruption risk as manageable. F88's title lending business is currently supervised under the Ministry of Public Security's framework, and management continues to engage closely with relevant authorities. While its all-in pricing of 32–55% p.a. is above traditional bank lending, it is not significantly out of line with consumer finance companies' rates of around 30–40% p.a., per our observation. We also believe F88 has meaningful buffers against potential regulatory tightening, including proactive lending-yield normalization that fuels growth, improving funding access, low leverage of 2–3x, and operating-efficiency gains as branch scale and technology adoption deepen.

F88 shares key elements of MWG's equity story. MWG formalized a fragmented market through a standardized store network, scaling from seven outlets in 2007 to ~3,000 today while leading sector growth and sustaining strong ROE. We believe F88 has a similar story in Vietnam's informal credit market, where rising branch density and loan books per branch should improve fixed-cost absorption, profitability, and ROE, provided credit quality remains controlled. Near-term catalysts such as the public offering and potential HOSE transfer could further enhance liquidity, visibility, and institutional access.

2026F Outlook: Strong disbursements to drive earnings

Figure 1: Vietcap's 2026F forecasts

VND bn	2025	2026F old	2026F new	2026F new vs 2025	Vietcap's comments
Total revenue (including recovery income)	**4,392**	**5,543**	**7,116**	**62%**	* We forecast total disbursement volume to reach VND23.3tn (+46% YoY). As of June, F88 has 972 stores. Q1 2026 total disbursements were VND5.2tn (+59% YoY).
Insurance revenue	498	511	883	77%	* Standalone insurance is becoming a meaningful growth engine, not merely a loan-bundled add-on. Q1 2026 insurance revenue rose 93% YoY to VND169bn (358,000 contracts), equivalent to around 12% of total revenue, while standalone insurance revenue grew from a low base by 726% YoY to VND15bn.
Lending revenue	3,894	5,032	6,233	60%	
Total expenses	**(3,484)**	**(4,270)**	**(5,642)**	**62%**	
Employee expenses	(1,277)	(1,551)	(2,014)	58%	
Allowance expenses	(1,009)	(1,376)	(1,947)	93%	
Financial expense	(475)	(597)	(742)	56%	
Others	(724)	(746)	(938)	30%	
PBT	**908**	**1,263**	**1,474**	**62%**	
NPAT-MI	**719**	**988**	**1,168**	**62%**	* Q1 2026 NPAT-MI was VND241bn (+131%) indicating strong growth momentum. We expect stronger seasonal earnings contributions in coming quarters.
Total outstanding loans growth	61.0%	19.8%	58.2%	-2.9 ppts	* Apart from its strong physical network, the revolving credit product via mobile app My F88 should further strengthen loan growth via optimizing customer lifetime value and enhancing customer retention.
Total borrowings growth	23.3%	17.8%	73.7%	50.3 ppts	
Lending yield (%)*	59.0%	62.6%	58.4%	-0.6 ppts	
Funding costs (%)	14.6%	12.7%	15.1%	0.5 ppts	* F88's diversifying funding toward more favorable channels including public bonds issuance and partnerships with commercial banks should counteract most of the upward pressure from the current high interest rate environment.
Credit costs (%)	16.9%	19.1%	20.4%	3.6 ppts	* Strong expansion could create pressure on credit costs, but the absolute level remains manageable. On-time repayment reached 84.1% in Q1 2026 (above the company's target of 80%).
Write-offs/Average outstanding loans	16.4%	19.0%	20.0%	3.6 ppts	
Recovery income/Write-offs	37.0%	39.0%	35.0%	-2.0 ppts	
CIR (%)	51.1%	52.2%	46.3%	-4.8 ppts	* CIR should improve as strong store expansion in 2025 fuels top-line growth while new store openings have also slowed down in 2026.
ROE	**34.4%**	**32.8%**	**39.1%**	**4.6 ppts**	
ROA	**12.1%**	**11.9%**	**13.3%**	**1.2 ppts**

Taxes/Total assets	-2.2%	-3.2%	-3.5%	-3.7%	-3.5%	-3.6%	-3.6%
ROAA	7.8%	12.1%	13.3%	14.2%	13.5%	13.6%	13.7%
Equity multiplier	2.9	2.8	3.0	2.5	2.3	2.2	2.0
ROAE	22.8%	33.8%	40.4%	35.3%	30.4%	29.3%	28.0%

Source: Company data; Vietcap. ROAE in this table is different from direct-calculated ROAE as we use year-end equity multipliers.

We forecast F88's ROAE to remain highly attractive over 2025-2030F, peaking at 40.4% in 2026F before normalizing to 28.0% by 2030F. The moderation in ROE is mainly driven by our conservative forecast for a gradual decline in the equity multiplier from 3.0x in 2026F to 2.0x in 2030F, as F88's capital base expands and balance-sheet leverage becomes more conservative. Nevertheless, ROE should remain well above the broader financial-sector average, underpinned by resilient asset productivity and continued operating efficiency gains.

The key driver is F88's strong and stable ROAA profile, which we estimate at 13.3% in 2026F and broadly sustained at 13.5-14.2% over 2027-2030F. This reflects a combination of improving net interest income, disciplined cost control, and resilient recovery income. Net interest income/total assets are projected to rise steadily from 5.0% in 2025 to 7.9% in 2030F, while costs/total assets decline from 33.7% to 23.3% over the same period as the branch network matures and operating leverage improves along with F88's extensive technology adoption.

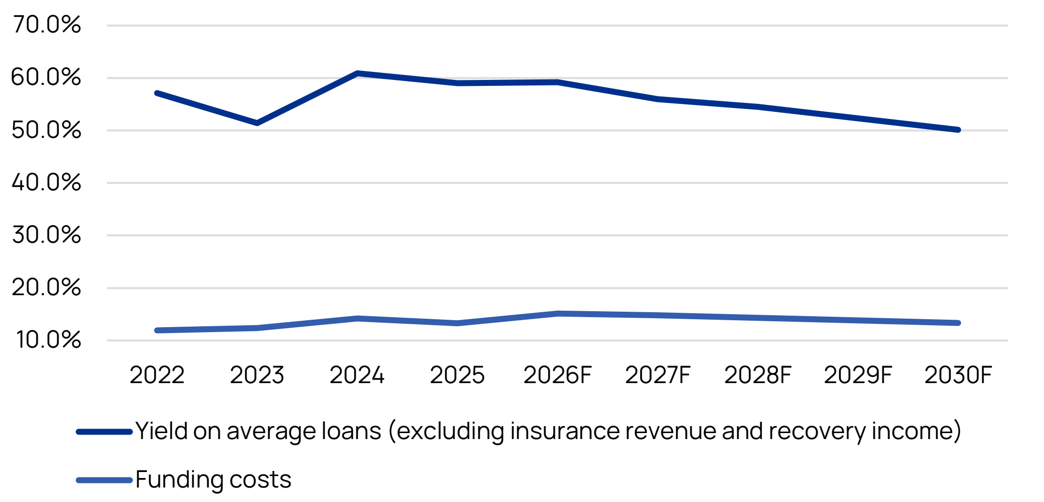
Provision expenses should remain elevated at around 18-22% of total assets, reflecting the nature of F88's mass-market secured lending model, but this is largely absorbed by high asset yields and diversifying fee income streams (primarily insurance business).

Regulatory overhang: manageable, with meaningful buffers

We acknowledge regulatory overhang as a key concern for F88, given its exposure to the underbanked consumer credit segment and relatively high all-in borrowing costs. However, we believe the near-term risk of disruptive tightening is manageable. F88's title lending business is currently supervised under the Ministry of Public Security's framework, while the company continues to engage closely with relevant authorities. Given the market's under penetration and specialized nature, F88 expects limited likelihood of direct SBV intervention in the short term.

Additionally, F88's target segment partly overlaps with consumer finance companies (already under the SBV's supervision), where lending rates are not directly capped, and average market rates are currently around **30–40% p.a.** on average for two-wheeler loans and cash loans**.** F88's current all-in pricing of roughly **32–55% p.a.** (per the company's public disclosure) is therefore not significantly out of line, considering its smaller-ticket, shorter-duration, and higher-touch secured lending model, in our view.

Figure 5: Lending yield and funding costs



Source: F88, Vietcap

Management is also proactively mitigating this risk through a more competitive pricing strategy to drive demand, which should also support higher-quality growth. We already factor in lending-yield normalization, forecasting F88's lending yield, excluding recovery income, to decline from 59% in 2025 to 50% by 2030F.

F88 also has several profitability buffers, including lower funding costs from public bonds, equity raising, and bank partnerships; room to optimize leverage, with forecast average ROE of 33.5% over 2026–2030F despite leverage of only 2–3x; and improving operating efficiency as the network scales and technology adoption deepens.

F88 shares key elements of MWG's equity story, but with a different risk profile as a lender

We believe F88's investment case can be framed through the case study on MWG in the 2010s. Both companies have formalized large and fragmented markets through a standardized physical network.

MWG scaled from only seven stores in 2007 to ~3,000 stores in 2025, claiming 60% market share in mobile phones and ~40% in consumer electronics. MWG did not simply take market share from traditional electronics retailers; it helped expand and professionalize the sector. Compared to traditional retailers, MWG offers a superior product assortment, pricing transparency, service quality, and customer finance solutions, while remaining close to consumers with street-front minimart store formats. This helps gain consumer trust while also providing convenience and product affordability.

Mekong Capital invested in MWG in 2007 and made a 57x return in its exit in 2018. Since then, MWG's share price and earnings continued to triple in 2018-2025, while maintaining an average ROE of 24%. It has reached a scale at which its superior service offerings dramatically reduced need for price competition and its second largest competitor has low profitability.

F88 is applying a similar model to Vietnam's informal credit market. The company has established a strong first-mover position, with around 85% share in the new-generation pawn-chain segment and a VND7.2tn loan book at end-2025, within a broader VND283tn market growing 17–20% annually (according to Fiin Group research). This points to a multi-year structural runway rather than a purely cyclical recovery story.

The key similarity is scale-led operating leverage. For MWG, rapid store rollout, rising store maturity, and stronger bargaining power allowed profits and ROE to improve as the network expanded. F88 has a similar potential path: as branch density improves and its loan book per branch rises, fixed costs should be absorbed across a larger earning-asset base, supporting stronger profitability and ROE, provided credit quality remains controlled.

Other parallels are also relevant. Mekong Capital's involvement provides a common thread in governance and execution discipline. Both businesses benefit from a first-mover scale flywheel, where network density improves customer acquisition, brand recognition, and operating efficiency. Near-term catalysts, including the public offering and potential HOSE transfer, could also improve liquidity, institutional accessibility, and market visibility.

The key difference is risk profile. Unlike MWG, F88 is a lender, so credit cost, asset-quality cyclicality, funding costs, and regulatory risk are the main swing factors. MWG also offers a useful warning: network expansion only creates value when supported by sound unit economics. For F88, branch rollout and loan-book growth must remain anchored to underwriting discipline, funding resilience, and return control.

Valuation

We value F88's target price (TP) using a triangulated framework that assigns equal weights to the residual income, P/E, and P/B methodologies.

In this Update Report, we raise our TP by 17%, as the positive impact from rolling forward our valuation horizon to mid-2027F and lifting our aggregate 2026–2030F earnings forecast by 18% more than offsets the reduction in our target P/E and P/B from 22.0x/3.5x to 20.0x/2.8x, respectively. The lower target multiples reflect a more prudent valuation stance following the stock's rerating, while also factoring in residual execution, funding-cost, and regulatory risks associated with F88's rapid expansion, particularly given a more elevated interest rate environment than previously expected. Nevertheless, F88's superior growth profile, improving ROE trajectory, and market leadership continue to justify a premium valuation, in our view.

Source: Company data as of June 22, 2026, Vietcap compilation

F88 trades at a clear premium to regional vehicle/title-lending peers, with a 2026F P/B of 6.4x and P/E of 20.1x vs peer medians of 1.2x and 9.5x, respectively. However, we believe this premium is largely warranted by F88's superior return profile, with ROE of 37.9% vs the peer median of 14.3%, and a much higher NIM of 53.7% vs 13.8%, reflecting its short-duration, high-yield secured lending model.

We also note that most regional peers operate in more mature vehicle/title-lending markets such as Thailand, India, Indonesia, and Malaysia, while Vietnam remains at an early stage of formalization. This gives F88 a stronger structural growth runway, especially given its first-mover position in the new-generation pawn-chain segment. Importantly, F88's asset/equity ratio of 2.7x is broadly in line with the peer median of 2.8x, suggesting that its high ROE is driven by asset yield and operating efficiency rather than excessive leverage. This also leaves balance-sheet headroom to absorb profitability headwinds and support future growth.

We believe comparable M&A transactions in alternative financing across Vietnam and Thailand in the previous period provide a more relevant reference for F88's current growth stage. Transactions during 2017–2021 were completed at median multiples of 22.8x P/E and 3.9x P/B, despite median ROAE of only 14.6%. Against this backdrop, F88's valuation remains attractive, in our view, given its materially higher profitability, early leadership in an underpenetrated market, and stronger long-term growth outlook. Our target P/B of 2.8x is roughly the justified P/B suggested by the Gordon Growth Model, with our average ROE in 2024-2030F at 32.1%, cost of equity at 14.0%, and a terminal growth assumption of 4.0%.

Vietcap Rating System

Stock ratings are set based on projected total shareholder return (TSR), defined as (target price – current price)/current price + dividend yield, and are not related to market performance.

Equity rating key	Definition
BUY	If the projected TSR is 20% or higher
OUTPERFORM	If the projected TSR is between 10% and 20%
MARKET PERFORM	If the projected TSR is between -10% and 10%
UNDERPERFORM	If the projected TSR is between -10% and -20%
SELL	If the projected TSR is -20% or lower
NOT RATED	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulation and/or firm policies in certain circumstances, including when Vietcap is acting in an advisory capacity in a merger or strategic transaction involving the company.
RATING SUSPENDED, COVERAGE TERMINATED	A rating may be suspended, or coverage terminated, if fundamental information is deemed insufficient to determine a target price or investment rating or due to a reallocation of research resources. Any previous investment rating and target price are no longer in effect.

Unless otherwise specified, these performance parameters are set with a 12-month horizon. Movement in share prices may cause a temporary mismatch between the latest published rating and projected TSR for a stock based on its market price and the latest published target price.

Target prices are generally based on the analyst's assessment of the stock's fair value over a 12-month horizon. However, the target price may differ from the analyst's fair value if the analyst believes that the market will not price the stock in line with assessed fair value over the specified time horizon.

Risks: Past performance is not necessarily indicative of future results. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument mentioned in this report. For investment advice, trade execution, or other enquiries, clients should contact their local sales representative.

Disclaimer

Analyst Certification of Independence

We, Ngoc Huynh and Nam Hoang, hereby certify that the views expressed in this report accurately reflect our personal views about the subject securities or issuers. We also certify that no part of our compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report. The equity research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues, which include revenues from, among other business units, Institutional Equities and Investment Banking.

Vietcap and its officers, directors and employees may have positions in any securities mentioned in this document (or in any related investment) and may from time to time add to or dispose of any such securities (or investment).Vietcap may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment.

 This report has been prepared on the basis of information believed to be reliable at the time of publication. Vietcap makes no representation or warranty regarding the completeness and accuracy of such information. Opinions, estimates and projection expressed in this report represent the current views of the author at the date of publication only. They do not necessarily reflect the opinions of Vietcap and are subject to change without notice. This report is provided, for information purposes only, to institutional investors and retail clients of Vietcap in Vietnam and overseas in accordance to relevant laws and regulations explicit to the country where this report is distributed, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction. Investors must make their investment decisions based upon independent advice subject to their particular financial situation and investment objectives. This report may not be copied, reproduced, published or redistributed by any person for any purpose without the written permission of an authorized representative of Vietcap. Please cite sources when quoting.

U.K. and European Economic Area (EEA): Unless specified to the contrary, issued and approved for distribution in the U.K. and the EEA by Vietcap issued by Vietcap has been prepared in accordance with Vietcap's policies for managing conflicts of interest arising as a result of publication and distribution of investment research. Many European regulators require a firm to establish, implement and maintain such a policy. This report has been issued in the U.K. only to persons of a kind described in Article 19 (5), 38, 47 and 49 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (all such persons being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is only available to relevant persons and will be engaged in only with relevant persons. In other EEA countries, the report has been issued to persons regarded as professional investors (or equivalent) in their home jurisdiction. **Australia:** This material is issued and distributed by Vietcap in Australia to "wholesale clients" only. Vietcap does not issue or distribute this material to "retail clients". The recipient of this material must not distribute it to any third party or outside Australia without the prior written consent of Vietcap. For the purposes of this paragraph the terms "wholesale client" and "retail client" have the meanings given to them in section 761G of the Corporations Act 2001. **Hong Kong:** The 1% ownership disclosure as of the previous month end satisfies the requirements under Paragraph 16.5(a) of the Hong Kong Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission. (For research published within the first ten days of the month, the disclosure may be based on the month end data from two months prior.) **Japan:** There is a risk that a loss may occur due to a change in the price of the shares in the case of share trading, and that a loss may occur due to the exchange rate in the case of foreign share trading. In the case of share trading, Vietcap will be receiving a brokerage fee and consumption tax (shouhizei) calculated by multiplying the executed price by the commission rate which was individually agreed between Vietcap and the customer in advance. **Korea:** This report may have been edited or contributed to from time to time by affiliates of Vietcap. **Singapore:** Vietcap and/or its affiliates may have a holding in any of the securities discussed in this report; for securities where the holding is 1% or greater, the specific holding is disclosed in the Important Disclosures section above. **India:** For private circulation only, not for sale. **Pakistan:** For private circulation only, not for sale. **New Zealand:** This material is issued and distributed by Vietcap in New Zealand only to persons whose principal business is the investment of money or who, in the course of and for the purposes of their business, habitually invest money. Vietcap does not issue or distribute this material to members of "the public" as determined in accordance with section 3 of the Securities Act 1978. The recipient of this material must not distribute it to any third party or outside New Zealand without the prior written consent of Vietcap. **Canada:** The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, or solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. The information contained herein is under no circumstances to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed judgment upon these materials, the information contained herein or the merits of the securities described herein, and any representation to the contrary is an offence. **Dubai:** This report has been issued to persons regarded as professional clients as defined under the DFSA rules. **United States:** This research report prepared by Vietcap is distributed in the United States to Major US Institutional Investors (as defined in Rule 15a-6 under the Securities Exchange Act of 1934, as amended) only by Decker&Co, LLC, a broker-dealer registered in the US (registered under Section 15 of Securities Exchange Act of 1934, as amended). All responsibility for the distribution of this report by Decker&Co, LLC in the US shall be borne by Decker&Co, LLC. All resulting transactions by a US person or entity should be effected through a registered broker-dealer in the US. This report is not directed at you if Vietcap Broker or Decker&Co, LLC is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to you. You should satisfy yourself before reading it that Decker&Co, LLC and Vietcap is permitted to provide research material concerning investment to you under relevant legislation and regulations.
