The Privé handovers from 2027F to fuel robust 2027/28F earnings

- We maintain our BUY rating for DXG and revise up our target price (TP) by 4% to VND17,000/share from VND16,400/share (adjusted for a 14% bonus share issuance).
- Our higher TP is mainly driven by the inclusion of Ngoc Khanh, Opal Luxury, and Saigon Riverfront, rolling our valuation horizon forward to mid-2027, and a higher valuation for the brokerage segment (see details in our [DXS Update Report](#), dated June 11, 2026), partly offset by higher net debt balance and our removal of Lux Riverview and Zen Riverside from valuation.
- We forecast 2026F NPAT-MI of VND239bn (USD9.1mn; +4% YoY), driven by handovers of unbilled backlog at Gem Sky World (GSW), contributions from the brokerage segment, and higher YoY financial income. For 2027F, we forecast NPAT-MI to surge 8x to VND1.9tn (USD71mn), driven mainly by the commencement of scheduled handovers at The Privé and higher contributions from GSW. We broadly maintain our 2026/27F NPAT-MI forecasts.
- We forecast DXG's presales at VND11.7tn (USD444mn) in 2026F and VND7.2tn (USD273mn) in 2027F. Our 2026F forecast is entirely driven by ongoing sales at The Privé, while the 2027F forecast reflects contributions from The Privé, the expected relaunch of GSW in 2027F (vs end-2026F previously), and the expected launch of Ngoc Khanh. We further project 2028F presales of VND8.7tn (USD330mn), supported by a more diversified project mix, including GSW, Ngoc Khanh, and new projects Opal Luxury and Opal Cityview.
- DXG is trading at 1.1x/1.0x 2026/27F P/Bs, based on our forecasts, vs its 5-year average of 1.4x, which we view as compelling given its visible 2026-27F earnings outlook.
- Downside risk: Slower-than-expected new launches.

The Privé ongoing and GSW relaunch to underpin 2026-27F presales: We expect The Privé (4.3 ha in Binh Trung Ward, HCMC; ~3,200 units across 12 blocks, with ~50% of all units presold) to be fully sold out in 2027F, with handovers commencing from 2027F; the project is estimated to account for ~81% of DXG's presales forecast over 2026-27F. Meanwhile, we expect GSW (~4,000 low-rise and land-plot units in Dong Nai; ~60% presold as of end-Q1 2026) to relaunch in 2027F (vs end-2026F previously) to reflect our more conservative assumption on launch timing, while demand outlook at this project remains supported by the ongoing development of Long Thanh International Airport.

New launches in former Binh Duong Province to drive the next presales cycle: Beyond GSW and The Privé, DXG has a sizeable development pipeline comprising nine projects with a total site area of approximately 50 ha. For the medium term (2027-28F), we expect presales launches at Ngoc Khanh (~1 ha), Opal Cityview (~1 ha), and Opal Luxury (8.6 ha), all located in former Binh Duong Province (now part of HCMC), given their relatively clearer path to launch within the company's development pipeline.

2026 Outlook: Earnings to remain broadly stable YoY as higher financial income offsets weaker operating earnings

– Development	2,049	1,915	1,915	-7%	0%	* We maintain our forecast as we continue to expect development revenue in 2026F to be largely driven by (1) ongoing handovers of unbilled backlog at Gem Sky World (GSW; total ~4,000 low-rise units, ~60% presold) and (2) ongoing sales/handovers at DXS's (59%-owned subsidiary of DXG) self-developed projects – Regal Victoria, Regal Maison, and Regal Legend. * We expect revenue to pick up strongly from 2027F, driven by the commencement of handovers at The Privé and resumed sales launches at GSW.

Figure 5: Gem Sky World (GSW)

- Developer: Ha An Real Estate Investment and Trading JSC (DXG owns 100%).
- Location: In Dong Nai Province and ~10 km from the planned Long Thanh International Airport and surrounded by busy industrial parks.
- Size area: 92 ha. Total includes ~4,000 low-rise/land-plot units.
- DXG acquired this project in Q4 2019 via public auction.
- First launched in July 2020 with ~700 presold units.
- As of end-Q1 2026, accumulated presold units at GSW remained at ~2,400 units (~60% of total units), unchanged vs end-2025, as DXG has yet to relaunch the project.
- We project the remaining unsold units at the GSW project to contribute a total of ~VND6.7tn (USD255mn) in presales to DXG in 2027-2029F, and the deliveries of this project to be completed by 2029F.

Figure 6: The Privé

- Developer: Bluemarq Group (DXG)
- Location: HCMC. The project is positioned along the front of the Long Thanh Dau Giay Expressway and features three river-facing sides.
- Size area: 4.3 ha. Total includes ~3,200 high-rise units.
- DXG acquired the project from Keppel Land and launched presales in 2018 with an ASP of VND33-38mn/sqm. However, due to complex legal procedures, the project faced delays and only obtained a construction permit in September 2024. DXG completed foundation construction.
- As of end-Q1 2026, ~50% of total units have been presold (Blocks 5-8/Phase 1 and blocks 10-11). Block 9 is currently under booking.
- We project The Privé to contribute VND15.2tn (USD578mn; compared to ~VND10.8tn in 2025E) to DXG's 2026-2027F presales, with deliveries scheduled over 2027-2029F.

Valuation

We derive a one-year target price for DXG at **VND17,000/share** by using the RNAV valuation method, which is best suited to capture DXG's long-term growth potential, in our view. We have factored in all the identified land bank for projects that are under construction and under development via the DCF method, discounting estimated FCF to mid-2026.

We revise our TP up 4% to VND17,000/share from VND16,400/share (adjusted for a 14% bonus share issuance). Our higher TP is largely due to (1) including Ngoc Khanh, Opal Luxury, and Saigon Riverfront in our valuation and forecasts, given their relatively clearer path to launch within DXG's medium-term development pipeline, (2) rolling our valuation horizon forward to mid-2027 from end-2026, and (3) a higher valuation for the brokerage segment (see more details in our June 11 DXS Update Report). The positive impact of these factors is partly offset by (1) a higher net debt position (excluding DXS's cash and debt balances, which are already captured in our brokerage segment valuation) as of end-Q1 2026 and (2) our exclusion of Lux Riverview and Zen Riverside from the valuation as they are currently not included in the company's 2026-2030 launch pipeline.

Company name change

Following shareholder approval at the AGM in April 2026 authorizing the Board of Directors to research and select a new company name – ensuring consistency with its business strategy and full compliance with applicable laws and regulations – DXG officially changed its name in May 2026 to Bluemarq Group Joint Stock Company (HOSE: DXG). Management described the name change as a significant transformation since the company's establishment, representing a breakthrough in branding, operational structure, and long-term development vision.

Vietcap Rating System

Stock ratings are set based on projected total shareholder return (TSR), defined as $(\text{target price} - \text{current price}) / \text{current price} + \text{dividend yield}$, and are not related to market performance.

Equity rating key	Definition
BUY	If the projected TSR is 20% or higher
OUTPERFORM	If the projected TSR is between 10% and 20%
MARKET PERFORM	If the projected TSR is between -10% and 10%
UNDERPERFORM	If the projected TSR is between -10% and -20%
SELL	If the projected TSR is -20% or lower
NOT RATED	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulation and/or firm policies in certain circumstances, including when Vietcap is acting in an advisory capacity in a merger or strategic transaction involving the company.
RATING SUSPENDED, COVERAGE TERMINATED	A rating may be suspended, or coverage terminated, if fundamental information is deemed insufficient to determine a target price or investment rating or due to a reallocation of research resources. Any previous investment rating and target price are no longer in effect.

Unless otherwise specified, these performance parameters are set with a 12-month horizon. Movement in share prices may cause a temporary mismatch between the latest published rating and projected TSR for a stock based on its market price and the latest published target price.

Target prices are generally based on the analyst's assessment of the stock's fair value over a 12-month horizon. However, the target price may differ from the analyst's fair value if the analyst believes that the market will not price the stock in line with assessed fair value over the specified time horizon.

Risks: Past performance is not necessarily indicative of future results. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument mentioned in this report. For investment advice, trade execution, or other enquiries, clients should contact their local sales representative.
