Company Overview

GMD is one of Vietnam's largest port operators and domestic logistics service providers with integrated capabilities across the logistics value chain. In addition to its core business in port operations and logistics services, GMD has investments in real estate projects and rubber plantations.

Strong 2026F earnings growth, valuation remains compelling

- We reiterate our BUY rating for GMD and lift our target price (TP) by 2% to VND95,500/share.
- Our TP revision is mainly driven by rolling our valuation horizon forward to mid-2027, partly offset by higher 2026F capex, including ~VND540bn (USD34.6mn; our estimates) for GMD's 60% stake in a new 33-ha container yard near Nam Dinh Vu (NDV), higher Gemalink net debt reflecting increased borrowing for GML2 construction, and a higher share count of 432.9mn vs 426.5mn due to ESOP. We keep our earnings projections broadly unchanged: 3% higher volume for Phuoc Long and Binh Duong, and lower MI (on a weaker-than-expected Q1 result and lower NDV forecast as we believe NDV accounts for a proportionally large share in consolidated MI) offset 4% weaker NDV volume and slightly lower blended GPM during 2026-30F as NDV ramps up slower than expected. For GML, we raise 2026F volume by 2% while keeping forecasts for other years broadly unchanged. We maintain ASP forecasts for all ports.
- For 2026F, we raise core NPAT-MI by 1% (on 10% lower MI), while trimming NPAT by 1% as stronger volumes at Binh Duong, Phuoc Long, and Gemalink, plus higher financial income on a strong Q1 result, are offset by weaker NDV volume, lower blended GPM, and higher financial expenses. We forecast core 2026F NPAT-MI to grow 34% YoY.
- Upside potential:** Non-core assets divestment, GML's berth length extension, potential one-off gain from GMD-CJ JVs restructuring deal (see [page 7](#)).

We still like GMD for (1) its high-quality, well-managed ports with strategic locations, (2) Vietnam's strong trade fundamentals, and (3) supportive port market dynamics. In the north, Lach Huyen's capacity intensifies deep-sea competition but NDV remains competitive; in the south, robust demand and tight supply benefit all of GMD's southern ports. We are positive on GML's next-5Y outlook, as it is the only port with a clear expansion pipeline in the Cai Mep – Thi Vai (CM-TV) region, positioning it well to capture incremental demand over the period. More details are in our [Seaports Sector Flash](#), dated February 26, 2026.

In this Update Report, we assume some demand softening in export markets due to the Middle East conflict, given weaker March–April PMI data (see [page 5](#)), reflected via lower NDV volume and only modestly higher southern port forecasts despite a much stronger Q1 result. That said, during Sep 2024 – Sep 2025, PMI was also weak, yet trade and FDI flows remained solid. If this pattern repeats, there should be upside to our current volume forecast for GMD.

Valuation remains compelling vs the 5Y average and peers, given a strong earnings outlook:

At its current price, GMD trades at 13.1x 2026F core P/E and 7.6x EV/EBITDA, ~1.1SD and ~1.6SD below its 5Y averages. Vs peers, GMD is also being traded at a discount, with TTM and 2026F EV/EBITDA (with EBITDA including income from affiliates) of 9.2x and 7.6x, vs non-Chinese peer medians of 11.5x and 11.1x, respectively. In our view, this discount appears unwarranted, given Vietnam's stronger trade outlook, GMD's leading position, and its expansion pipeline – GML2 and GML3 can double capacity to 3mn TEUs p.a. in the current plan, and up to 4mn TEUs p.a. if the berth-length extension is approved. Historically, GMD has traded at a wide premium to peers.

2026 Outlook: Strong earnings growth driven by all ports

Figure 1: Vietcap's 2026 forecasts

VND bn	2025	2026F Old	2026F New	2026F New YoY	2026F N. vs O.	Vietcap's comments
Total revenue	5,946	7,355	7,340	23%	0%	* NDV: We cut our 2026F throughput forecast by 4% to 1.72mn TEUs (+15% YoY), reflecting a weaker-than-expected Q1 and potential demand disruption from Middle East conflict-induced inflation. * Phuoc Long + Binh Duong: We raise our volume forecast for these ports to 8% (from 5%), driven by a stronger-than-expected Q1, though there could be further upside as we factor in potential demand disruption from the Middle East conflict. * Further comments on Q1 volume performance are on the next page. * We maintain ASP forecasts for the ports (NDV: +5%, PL + BD: +20% YoY).
Ports	5,253	6,593	6,578	25%	0%	
Logistics	693	762	762	10%	0%	
Gross profit	2,715	3,463	3,384	25%	-2%	
Ports	2,388	3,099	3,026	27%	-2%	
Logistics	327	364	358	9%	-2%	
SG&A expenses	-1,088	-1,222	-1,244	14%	2%	
Operating profit	1,627	2,241	2,140	32%	-5%	
Financial income	227	213	256	13%	20%	
Financial expenses	-112	-154	-184	65%	19%	
Net income from affiliates (NIFA)	1,156	1,385	1,433	24%	3%	* Gemalink (80% of 2026F NIFA): We raise our volume growth forecast to 10% (from 8%) despite strong Q1 volume (+19% YoY), as we factor in potential demand disruption from the Middle East conflict. * SCS (17%): We forecast net profit to decline 8% YoY, still reflecting Long Thanh Airport (LTH) coming online mid-2026. See our SCS Update Report (January 13, 2026) for details. Upside potential from our team's latest assumption that LTH's commercial operation shifts to H1 2027 (vs mid-2026 previously) (see our team's ACV Update Report, April 6, 2026) is offset by downside risk from the Middle East conflict disruption. Further details are in our Q1 2026 SCS Earnings Flash. In this report, we also include our notes from the recent SCS x Vietcap Q1 2026 Earnings Call, where management outlined their scenario analysis on the Middle East and potential impact on SCS's revenue and NPAT (pages 6 & 7).
Other gains/losses	-394	-37	-37	-91%	0%	
PBT	2,505	3,647	3,608	44%	-1%	
NPAT	2,223	3,314	3,278	47%	-1%	
MI	547	704	633	16%	-10%	
NPAT-MI	1,676	2,610	2,645	58%	1%	
Core NPAT-MI*	1,992	2,639	2,674	34%	1%	
Gross margin	45.7%	47.1%	46.1%			
Ports	45.5%	47.0%	46.0%			
Logistics	47.3%	47.8%	47.0%			
SG&A/revenue	18.3%	16.6%	16.9%			* Forecast lowered slightly on a lower-than-expected Q1 result, driven by a slower NDV ramp-up that weighed on Q1 GPM. We believe that, in Q1, Phuoc Long ICD and Binh Duong port supported consolidated port GPM via higher ASPs and 12% YoY volume growth. Meanwhile, NDV underperformed, with an 8% YoY volume decline (despite new capacity) – raising fixed cost per unit – weighing on Q1 GPM. We expect port GPM to improve in upcoming quarters from the Q1 seasonal low and NDV ramp-up from attracting new service lines, per management's plan. * Forecast lowered slightly based on Q1 results.
Operating margin	27.4%	30.5%	29.2%			
NPAT-MI margin	28.2%	35.5%	36.0%			
Core NPAT-MI margin	33.5%	35.9%	36.4%

GMD's throughput data update

Figure 2: GMD's Q1 2026 results and GML's profit-per-TEU estimates

'000 TEUs	Q1 2025	Q4 2025	Q1 2026	QoQ	YoY
Nam Dinh Vu (NDV)	355	380	328	-14%	-8%
Gemalink (GML)	440	527	523	-1%	19%
- GML profit / TEU ('000 VND / USD)	VND557k / USD21.4	VND874k / USD33.6	VND685k / USD26.4	-22%	23%
Phuoc Long + Binh Duong	340	501	382	-24%	12%
Total throughput	1,135	1,408	1,233	-12%	9%

Source: GMD, Vietcap

Notes on Q1 2026 and April's volume performance:

Southern ports delivered solid Q1 results: GML volume rose 19% YoY and slipped only 1% QoQ (notably strong given Q4's seasonal high base and Q1's low season), while Phuoc Long + Binh Duong grew 12% YoY.

NDV Q1 volume was relatively weak, falling 8% YoY (QoQ decline is seasonal). Management attributes the YoY drop to (1) a high Q1 2025 base inflated by front-loading ahead of President Trump's reciprocal tariffs, and (2) intra-Asia port congestion in March 2026, which lengthened ship waiting times and reduced call frequency in the Hai Phong region. Disruptions caused by the Middle East conflict have also forced liners (i.e., ship operators) to redesign networks, delaying new service lines into NDV. Management views the delay as temporary and maintains their target of getting five new service lines this year.

Despite the subdued Q1, management reiterates confidence in the full-year NDV target of 1.85mn TEUs, which we believe hinges on contributions from incoming service lines. Our current forecast is more conservative as we are concerned about potential demand-side disruptions in Vietnam's exports markets from the Middle East conflict-induced inflationary pressure.

April data is encouraging: Per management's sharing at the 2026 AGM, NDV volume rose 20% MoM vs March (implied ~25% above the Q1 average), and GML recorded the highest monthly volume in the CM-TV region, surpassing TCIT (which has held the #1 position for years, per VPA data).

Comments on March and April 2026 PMI

We observed that March and April 2026 PMI turned weaker due to the impact of the Middle East conflict. In particular, key manufacturing sub-indices – including new orders and new export orders – dipped below 50 after several months of strength (>50). This may indicate weaker trade demand in the upcoming months.

However, we also note that during September 2024 – September 2025, these indicators also remained, or frequently dipped into, weak territory. Nevertheless, trade growth and FDI flows during this period remained solid, as shown in the three figures below (the red-highlighted period).

For this Update Report, we assume a certain degree of demand softening in export markets, which translates into softer volume growth for GMD, as explained in more detail in **Figure 1** on **page 2**. However, if the September 2024–2025 pattern repeats (i.e., PMI remains weak but actual trade data and FDI flows stay solid), there should be upside potential to our current revised forecast for GMD's volume growth.

SCS x Vietcap Q1 2026 Earnings Call – Key notes (GMD owns 33.4% in SCS)

1. 4M 2026 results

- Total cargo volume was 81,661 tonnes (-5.6% YoY; 30% of our 2026F forecast), driven by a 5.6% YoY decline in both international (63,622 tonnes; 31% of our 2026F forecast) and domestic (18,039 tonnes; 30% of our 2026F forecast) volumes.
- Total revenue reached VND397bn (USD15.3mn; +3.4% YoY; 36% of our 2026F forecast).
- NPAT was VND237bn (USD9.2mn; +1.2% YoY; 34% of our 2026F forecast).
- Gross profit margin compressed to 78.6% from 80.9% in 4M 2025.
- Net profit margin slightly improved to 64.7% from 64.2% in 4M 2025, despite weaker GPM, probably due to higher interest income from a higher-rate environment, noting that SCS has a high net-cash balance sheet.

Figure 9: SCS's 4M 2026 results

	4M 2025	4M 2026	YoY	2026F*	4M vs 2026F
Cargo volume (tonnes)	86,543	81,661	-5.6%	269,361	30%
International	67,426	63,622	-5.6%	208,770	31%
Domestic	19,117	18,039	-5.6%	60,591	30%
Revenue (VNDbn)	384	397	+3.4%	1,097	36%
NPAT (VNDbn)	234	237	+1.2%	707	34%
GPM	80.9%	78.6%		80.0%	
NPM	64.2%	64.7%		64.5%	

Source: SCS, Vietcap. *This forecast (made on January 13, 2026, per [this SCS Update Report](#)) assumes Long Thanh's new cargo terminal to operate from mid-2026.

2. Impact of the Middle East conflict

- Middle Eastern airlines (primarily Qatar and Emirates) account for 15%+ of SCS's cargo revenue.
- While volume dropped initially due to the conflict, airlines have normalized operations and are currently maintaining about 70% of their pre-crisis capacity.

Management outlined three financial scenarios based on fuel prices: **(1) Base Case (Fuel below USD110/barrel)**: Assumes moderate fuel price increases and Iran tensions with no major escalation. Airlines optimize routes, leading to slightly constrained but growing cargo; **(2) Bear Case (Fuel USD110–120/barrel)**: Assumes a prolonged conflict and strong fuel price increases. Airlines reduce long-haul flights, leading to a slight cargo decrease, which is partially offset by a shift from sea to air freight; **(3) Worst Case (Fuel Above USD120/barrel)**: Assumes a major conflict and global economic slowdown. Vietnam's exports decline significantly, airlines cut flights, and cargo drops sharply.

Figure 10: SCS management's 2026 scenario analysis

Scenario	Oil price (USD/barrel)	Revenue (VNDbn)	Revenue YoY	NPAT (VNDbn)	NPAT YoY	Vietcap's 2026F (VNDbn)	% of Vietcap's 2026F
Base Case	Below 110	1,200 to 1,300	Flat to +9%	760 to 820	+1% to +9%		Revenue: 109%–119% NPAT: 108%–116%
Bear Case	110–120	1,100 to 1,180	-8% to -1%	680 to 750	-10% to flat	Revenue: 1,097 NPAT: 707	Revenue: 100%–108% NPAT: 96%–106%
Worst Case	Above 120	900 to 1,050	-25% to -12%	500 to 650	-33% to -13%		Revenue: 82%–96% NPAT: 71%–92%

Source: SCS, Vietcap. We note that these are SCS management's scenario and their potential impact on SCS's earnings, not our in-house scenario and forecast (except for Vietcap's 2026F-related columns).

3. Long Thanh Airport (LTH)

- LTH cargo terminal No.1 (LTH-C1): Under construction. The contractor, Coteccons, plans to complete the air cargo terminal project by November of this year.
- LTH general infrastructure: Runway 1 and the Air Traffic Control (ATC) tower are 100% complete. The passenger terminal is nearly 90% complete and connectivity infrastructure is expected to be finished by end-Q3 or Q4 2026.
- Alternative plan (If SCS does not join LTH): SCS plans to restructure its TSN terminal and focus on other projects, including Office Building No. 2, and Maintenance, Repair, and Overhaul (MRO) project, and leveraging its gateway advantage to become a broader logistics distribution hub.
- Potential special dividends: If SCS does not participate in the LTH project, the company will pay cash dividends to maximize shareholder profits rather than holding to the cash.
- The "Dual-Airport" scenario: Management noted a highly feasible scenario where LTH and TSN operate as an integrated, dual-airport system rather than shifting all international flights to LTH. If ~50% of international flights (short and medium distance) remain at TSN, SCS will maintain very strong results even if it does not secure the LTH project as the vast majority of SCS's current international volume is from short and medium-haul flights.

Valuation

We apply a sum-of-the-parts (SoTP) approach to value GMD. We use the SoTP approach for GMD given the large contribution from its affiliates as well as the company's intention to divest its non-core assets. Our SoTP valuation includes:

(1) Port and consolidated logistics segments, which we value using a discounted cashflow (DCF) method as these businesses mostly generate predictable cash flows.

(2) Saigon Cargo Service (SCS), one of the main affiliates of GMD. We value SCS using the DCF method. For more details please see our January 13, 2026, [SCS Update Report](#).

(3) Gemalink port, which we value using the DCF method. We value Gemalink separately as we do not yet have sufficient information on its financial position to consolidate this project into our forecast for the core business.

For GML's net debt in this report, as we roll our TP forward to mid-2027, we use the average of the company's end-2025 net debt of ~VND2.3tn (USD88.3mn) and our end-2026F forecast of ~VND3.3tn (USD124.8mn). The YoY increase in our 2026F estimate reflects our assumption of new debt raised to fund the GML2 expansion, which broke ground in late April 2026, partly offset by estimated repayment of existing debt during the year.

(4) Rubber plantations, which we value by a P/B approach. We apply an unchanged target P/B of 1.2x, which is equivalent to the two-year average median P/B of selected peers. We benchmark GMD's rubber plantations against selected pure rubber plantation peers in Vietnam as there are no listed peers in Cambodia.

(5) CJ Gemadept Logistics and CJ Gemadept Shipping, valued on a relative P/E basis at an unchanged target multiple of 10.0x.

In late March 2026, GMD disclosed that it has entered negotiations with CJ Logistics to restructure these JVs: GMD would acquire CJ's 49.0% stake in the Shipping JV (i.e., CJ Gemadept Shipping) to take full ownership, while CJ Logistics would acquire GMD's 49.1% interest in the 3PL JV (i.e., CJ Gemadept Logistics).

Upon completion, GMD would remove the 3PL JV from its affiliate income line and fully consolidate the Shipping JV. That said, we view the earnings impact as modest given the JVs'

small scale relative to GMD. In 2025, the two JVs contributed VND49bn in affiliate income, compared with GMD's PBT of VND2.5tn (USD96.2mn).

The company announced on May 21, 2026, that the deal was completed, but the financial details have not been announced yet. Per the company, GMD can receive net cash proceeds of ~VND700bn (USD26.9mn) from the transaction; however, the P&L gain has not been disclosed.

For now, we have not incorporated this transaction into this Update Report, pending full financial details – which we think should be released in the upcoming Q2 financial results.

Background of these two companies:

GMD and CJ Logistics have maintained a multi-year strategic partnership through two JVs, both equity-accounted in GMD's consolidated financial statements:

- CJ Gemadept Shipping Holdings (the Shipping JV) – GMD holds 51.0%, CJ Logistics holds 49.0%, with equal voting rights. This JV provides container feeder and barge transport services connecting ports, ICDs, and industrial zones within GMD's integrated logistics network;
- CJ Gemadept Logistics Holdings (the 3PL JV) – GMD holds 49.1%, CJ Logistics holds 50.9%. This entity operates third-party and contract logistics services.

As of Q1 2026, GMD's book value investment stood at VND471bn (USD18.1mn) in the Shipping JV and VND178bn (USD6.8mn) in the 3PL JV.

(6) Real estate projects and other investments, which we estimate at book value given the current uncertainty around land-use rights approval and development timelines.

Figure 11: Valuation summary

Comments on our revised 2026F capex forecast: We raise our 2026F capex to more than VND1.8tn (USD69.2mn) from VND1.3tn (USD50.0mn). Our previous forecast captured ~VND1tn (USD38.5mn) in capex for new vessel investments in 2026F, per GMD's plan, with the remainder allocated to maintenance capex. The revised forecast adds ~VND540bn (USD20.4mn) for GMD's 60% stake in the 33-ha container yard near NDV that GMD plans to develop this year (implying estimated capex of VND900bn (USD34.6mn) for the whole container yard), as announced at its 2026 AGM in early May.

This VND900bn (USD34.6mn) is our own estimate, based on publicly quoted land prices of ~VND3mn/m² for 10-ha lots in the area (Source: Guland), which imply a cost of nearly VND1tn (USD38.5mn) for 33 ha. We apply a 10% discount to reflect the larger transaction size relative to the quoted 10-ha benchmark. If the actual capex is higher/lower vs this figure, there should be upside/downside to our 2026F capex forecast.

The 60% stake stems from GMD's May 22, 2026, announcement to establish Nam Dinh Vu Services JSC (NDS), located at lot CN27 in the NDV Non-Tariff Zone and Industrial Park, Hai Phong. The company has charter capital of VND500bn (USD18.9mn), 60% of which (VND300bn) is contributed by GMD. Per GMD, NDS is linked to the 33-ha container yard. NDS' location (lot CN27) also aligns with the information shared during the 2026 AGM.

Valuation Multiples

We believe P/E and EV/EBITDA are the two most meaningful multiples valuation metrics for GMD. In contrast, we view P/B as less relevant due to (1) GMD's non-core assets and (2) Gemalink – one of GMD's most important assets – not being consolidated on GMD's balance sheet.

GMD's valuation multiples history

Figure 17: GMD's core TTM PE ratio*

Source: Bloomberg, Vietcap's calculation (Data as of May 25, 2026). *GMD's TTM EPS exclude investment gain from divestments and other income/expenses.

Figure 18: GMD's TTM EV/EBITDA ratio*

Source: Bloomberg, Vietcap's calculation (Data as of May 25, 2026). *GMD's TTM EBITDA includes income from affiliate companies.

GMD's valuation multiples vs peers

For GMD's P/E ratio, we re-calculate using core NPAT-MI (i.e., earnings excluding divestment gain and other income/expenses). For the EV/EBITDA ratio, we use EBITDA plus income/(loss) from affiliates for both GMD and its peers because this is a significant income stream for GMD and some of its peer companies, mainly from affiliated ports (similar to income from GML to GMD).

Our analysis shows that GMD has historically traded at a large premium vs the blended peer median (peer group consists of regionally major listed port operators, including four Chinese and three non-Chinese companies), in terms of both TTM PE and EV/EBITDA metrics (**Figure 19 & 20**). We think this was due to GMD's better growth prospects vs peers (some of which have shown mature revenue and earnings growth – as shown by their latest 5Y revenue, NPAT-MI, and EBITDA CAGRs in **Figure 25**), which we attribute to (1) Vietnam's bright export growth trajectory, benefiting from the "China+1" strategy, over those years, (2) GMD being a leading port operator in Vietnam with assets located at prime locations to capitalize on that tailwind, and (3) GMD's port capacity expansion story.

Turning to the current valuation, a more granular comparison separating Chinese and non-Chinese peers shows that, vs Chinese peers, GMD is trading at a notably high premium (**Figure 21 & 22**). We view this as justified, given the materially higher trade barriers facing China compared with Vietnam. Compared to non-Chinese peers, however, GMD is trading at a discount (**Figure 23 & 24**), despite Vietnam's relatively stronger trade outlook (given low US tariff differentials, and "China+1"-driven strong fundamentals), GMD's leading position in the domestic port industry, and its capacity expansion plans. As such, we view GMD's current valuation as attractive in terms of peer comparison.

Figure 24: GMD's core TTM PE ratio* vs non-Chinese peer median's TTM PE ratio

Source: Bloomberg, Vietcap's calculation (Data as of May 25, 2026). *GMD's TTM EPS exclude investment gain from divestments and other income/expenses. We use reported EPS for the peer group.

Figure 25 shows that GMD is trading at a discount in terms of PE (TTM and 2026F) and EV/EBITDA multiples (TTM and 2026F) vs non-Chinese peers. The company stands out for its better growth (revenue, NPAT-MI, and EBITDA) and low leverage, but trails in ROE and ROA.

As the selected peer list is regional, for peer comparison, we prefer using the EV/EBITDA multiple rather than the P/E ratio because EV/EBITDA offers a clearer view of a company's core operating performance by excluding the effects of depreciation, amortization, capital structure, taxes, and other non-cash charges. Further, compared to P/E, EV/EBITDA significantly reduces distortions caused by differing accounting standards across countries (e.g., variations in tax regimes, depreciation methods, etc.), thereby providing a more consistent and comparable valuation metric.

GMD is currently trading at a TTM EV/EBITDA of 9.2x, below the non-Chinese peer median of 11.5x. On a 2026F basis, its EV/EBITDA is also lower vs non-Chinese peers (7.6x vs 11.1x). We view this valuation as attractive, supported by Vietnam's relatively competitive positioning vs non-Chinese countries in the region, GMD's leading position in the domestic port industry, and its capacity expansion plans, which we believe will ultimately translate into stronger growth prospects for GMD relative to non-Chinese peers.

Vietcap Rating System

Stock ratings are set based on projected total shareholder return (TSR), defined as $(\text{target price} - \text{current price}) / \text{current price} + \text{dividend yield}$, and are not related to market performance.

Equity rating key	Definition
BUY	If the projected TSR is 20% or higher
OUTPERFORM	If the projected TSR is between 10% and 20%
MARKET PERFORM	If the projected TSR is between -10% and 10%
UNDERPERFORM	If the projected TSR is between -10% and -20%
SELL	If the projected TSR is -20% or lower
NOT RATED	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulation and/or firm policies in certain circumstances, including when Vietcap is acting in an advisory capacity in a merger or strategic transaction involving the company.
RATING SUSPENDED, COVERAGE TERMINATED	A rating may be suspended, or coverage terminated, if fundamental information is deemed insufficient to determine a target price or investment rating or due to a reallocation of research resources. Any previous investment rating and target price are no longer in effect.

Unless otherwise specified, these performance parameters are set with a 12-month horizon. Movement in share prices may cause a temporary mismatch between the latest published rating and projected TSR for a stock based on its market price and the latest published target price.

Target prices are generally based on the analyst's assessment of the stock's fair value over a 12-month horizon. However, the target price may differ from the analyst's fair value if the analyst believes that the market will not price the stock in line with assessed fair value over the specified time horizon.

Risks: Past performance is not necessarily indicative of future results. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument mentioned in this report. For investment advice, trade execution, or other enquiries, clients should contact their local sales representative.

For the purposes of this paragraph the terms "wholesale client" and "retail client" have the meanings given to them in section 761G of the Corporations Act 2001. **Hong Kong:** The 1% ownership disclosure as of the previous month end satisfies the requirements under Paragraph 16.5(a) of the Hong Kong Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission. (For research published within the first ten days of the month, the disclosure may be based on the month end data from two months prior.) **Japan:** There is a risk that a loss may occur due to a change in the price of the shares in the case of share trading, and that a loss may occur due to the exchange rate in the case of foreign share trading. In the case of share trading, Vietcap will be receiving a brokerage fee and consumption tax (shouhizei) calculated by multiplying the executed price by the commission rate which was individually agreed between Vietcap and the customer in advance. **Korea:** This report may have been edited or contributed to from time to time by affiliates of Vietcap. **Singapore:** Vietcap and/or its affiliates may have a holding in any of the securities discussed in this report; for securities where the holding is 1% or greater, the specific holding is disclosed in the Important Disclosures section above. **India:** For private circulation only, not for sale. **Pakistan:** For private circulation only, not for sale. **New Zealand:** This material is issued and distributed by Vietcap in New Zealand only to persons whose principal business is the investment of money or who, in the course of and for the purposes of their business, habitually invest money. Vietcap does not issue or distribute this material to members of "the public" as determined in accordance with section 3 of the Securities Act 1978. The recipient of this material must not distribute it to any third party or outside New Zealand without the prior written consent of Vietcap. **Canada:** The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, or solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. The information contained herein is under no circumstances to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed judgment upon these materials, the information contained herein or the merits of the securities described herein, and any representation to the contrary is an offence. **Dubai:** This report has been issued to persons regarded as professional clients as defined under the DFSA rules. **United States:** This research report prepared by Vietcap is distributed in the United States to Major US Institutional Investors (as defined in Rule 15a-6 under the Securities Exchange Act of 1934, as amended) only by Decker&Co, LLC, a broker-dealer registered in the US (registered under Section 15 of Securities Exchange Act of 1934, as amended). All responsibility for the distribution of this report by Decker&Co, LLC in the US shall be borne by Decker&Co, LLC. All resulting transactions by a US person or entity should be effected through a registered broker-dealer in the US. This report is not directed at you if Vietcap Broker or Decker&Co, LLC is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to you. You should satisfy yourself before reading it that Decker&Co, LLC and Vietcap is permitted to provide research material concerning investment to you under relevant legislation and regulations.
